EDUCATION

- **Chitkara University** Rajpura , Punjab
B.E - C.S.E // C.G.P.A (5.63) 2022-2026

PROJECTS

- **Real state:** A Real Estate App using the MERN stack enables users to buy, sell, and browse properties online. Sellers can create listings with images, while buyers can search and view properties. It features user authentication, admin controls, and a responsive React frontend. The backend, built with Node.js and Express, connects to a MongoDB database for data storage.
- **GhureAsi:** It is a MERN stack-based travel guide app that helps users discover hotels and tour packages based on their desired travel destinations. It offers personalized recommendations, booking options, and destination details. The app uses React for the frontend, Node.js and Express for the backend, and MongoDB for data storage.
- **WeFine:** It is a Python-based app designed to provide first aid guidance in areas with limited medical access or where doctors are occupied with critical cases. The app offers step-by-step first aid instructions for common injuries and emergencies, helping users respond quickly and effectively. It aims to support basic healthcare in remote or resource-constrained environments.
